

## Adaptable handout 2: Lesson observation template

Use this handout:

- As a prompt for ECTs to record their observations of mentors or other colleagues
- As a prompt for mentors or other colleagues to record their observations of ECTs

Adapt this handout to:

- Specify details, if needed, about particular aspects of teaching or groups of pupils

It is important to:

- Discuss the observation together soon after the lesson (but not necessarily immediately)
- Keep writing to a minimum; this is a prompt for discussion between colleagues, not a formal assessment

What area of practice you looking for in the observation?	
What does the teacher do?	
What do the pupils do/learn?	
What have you learned from this observation?	
What will you do next?
